
THE NEW HP LASERJET 4000

Workgroup Printers that Manage Themselves

According to a recent study by International Data Corporation, in the year 2000 there will be approximately 212 million PCs connected to LANs. The challenge for the future will be to maintain consistent service and user satisfaction, in spite of increasing network loads. Now more than ever, users expect LANs to provide efficient, shared access to a variety of network resources.

The new LaserJet 4000 series printers are designed to meet this challenge. They improve workgroup laser printing in several ways from paper handling to print quality. They are combined with the industry-leading HP JetDirect 600N print servers and HP Web JetAdmin printer management software, making them a superior, network printing solution.

Features and Benefits

- 17 ppm engine, 100 MHz RISC processor and two 32-bit PCI-based EIO slots deliver faster throughput and out perform other laser printers.
- HP UltraPrecise toner uses 5-micron particles (less than the size of most other brands) for more accurate dot placement, enhanced grayscale and photo-like quality.
- Versatile paper handling (600-sheet standard capacity) reduces paper restocking.
- Instant-on fuser gives 15-second startup, even from Powersave mode.
- Intuitive control panel and operations minimize the number of help desk calls.
- Straight through paper path allows a wider variety of paper sizes and weights to be used.
- HP PCL 5e, HP PCL 6 and PostScript level 2 emulation ensure compatibility with both PC and Macintosh files.
- HP FastRes 1200 (printer default mode) prints 1200 dpi quality at the same speed as 600 dpi and with standard memory and HP ProRes 100 gives true 1200 dpi.
